

DiD event study: Shooting Incidents

High vs. low pre-treatment crime precincts | DiD: $b = -0.604$, $SE = 0.076$, $p < .001$

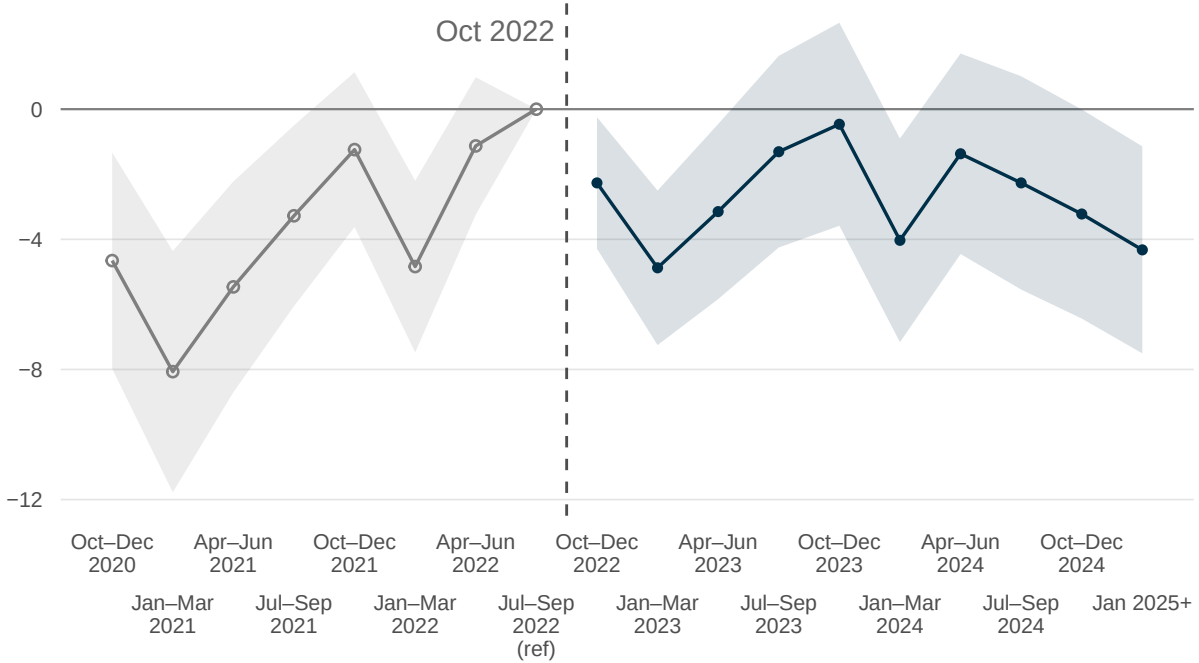

DiD event study: Gun Violence

High vs. low pre-treatment crime precincts | DiD: $b = -1.384$, $SE = 0.256$, $p < .001$

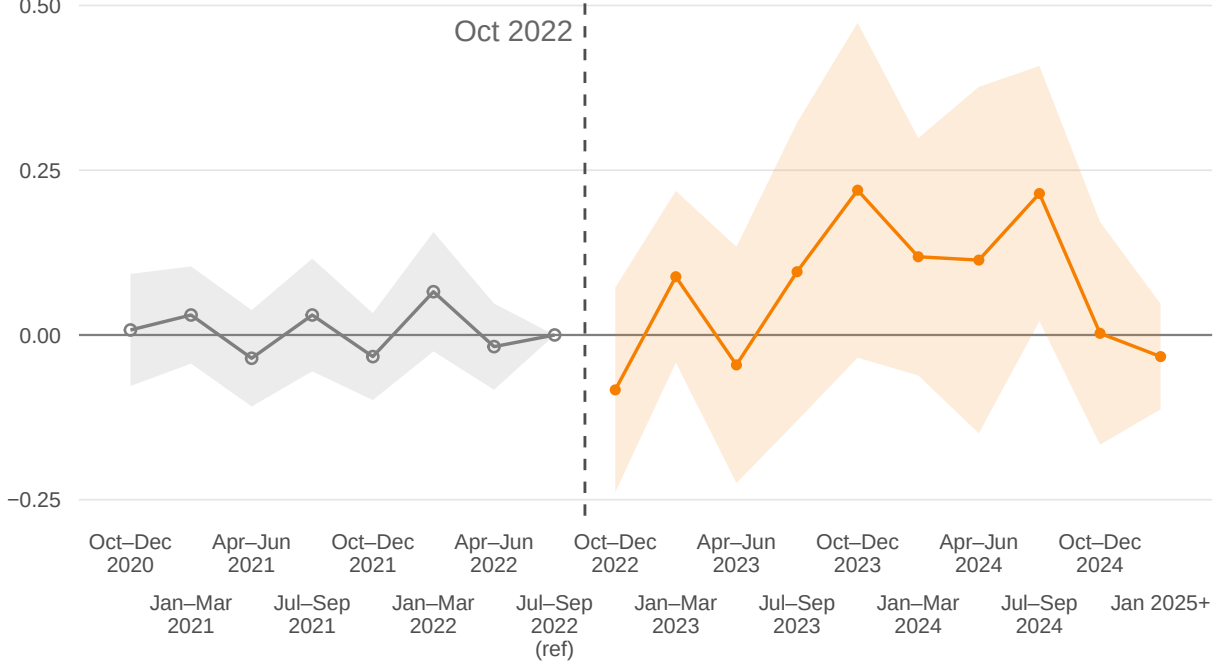

DiD event study: Robbery

High vs. low pre-treatment crime precincts | DiD: $b = 2.245$, $SE = 0.919$, $p = 0.017$

DiD event study: Pursuit Crashes

High vs. low pre-treatment crime precincts | DiD: $b = 0.043$, $SE = 0.047$, $p = 0.361$

Points: quarterly difference-in-differences coefficients (high minus low pre-treatment crime precincts), relative to bin -1 (Jul-Sep 2022). Bands: 95% confidence intervals. Standard errors clustered by precinct ($G = 77$). Dashed vertical line: October 2022 policy change. Pre-period coefficients departing from zero for the crime outcomes indicate non-parallel pre-trends; the collision panel is consistent with parallel trends.
